Our mission

Nash wants to make it as easy as possible for users to move traditional money into the crypto space...

...then access all the major crypto services in just one mobile app.

Our vision

Traditional money services alongside crypto in an app that feels like a digital banking platform – bridging the old and new financial systems

Manage your money

- ✓ National currency accounts with IBANs
- ✓ Debit card to spend both cash and crypto
- ✓ Deposit money into a high-yield earnings account powered by DeFi in a couple of clicks – just like a traditional savings account in a banking app

Invest in crypto

- ✓ Buy and sell crypto at market-leading rates
- ✓ Trade on the best decentralized exchanges
- ✓ Earn interest through popular DeFi protocols

Why Nash?

Security

Nash's crypto wallet is fully non-custodial and secured by multi-party computation.

[Learn more.](#)

Prices

Nash is able to offer highly competitive rates for crypto purchases. Compare our rates against [other platforms](#) and [third-party fiat ramps](#).

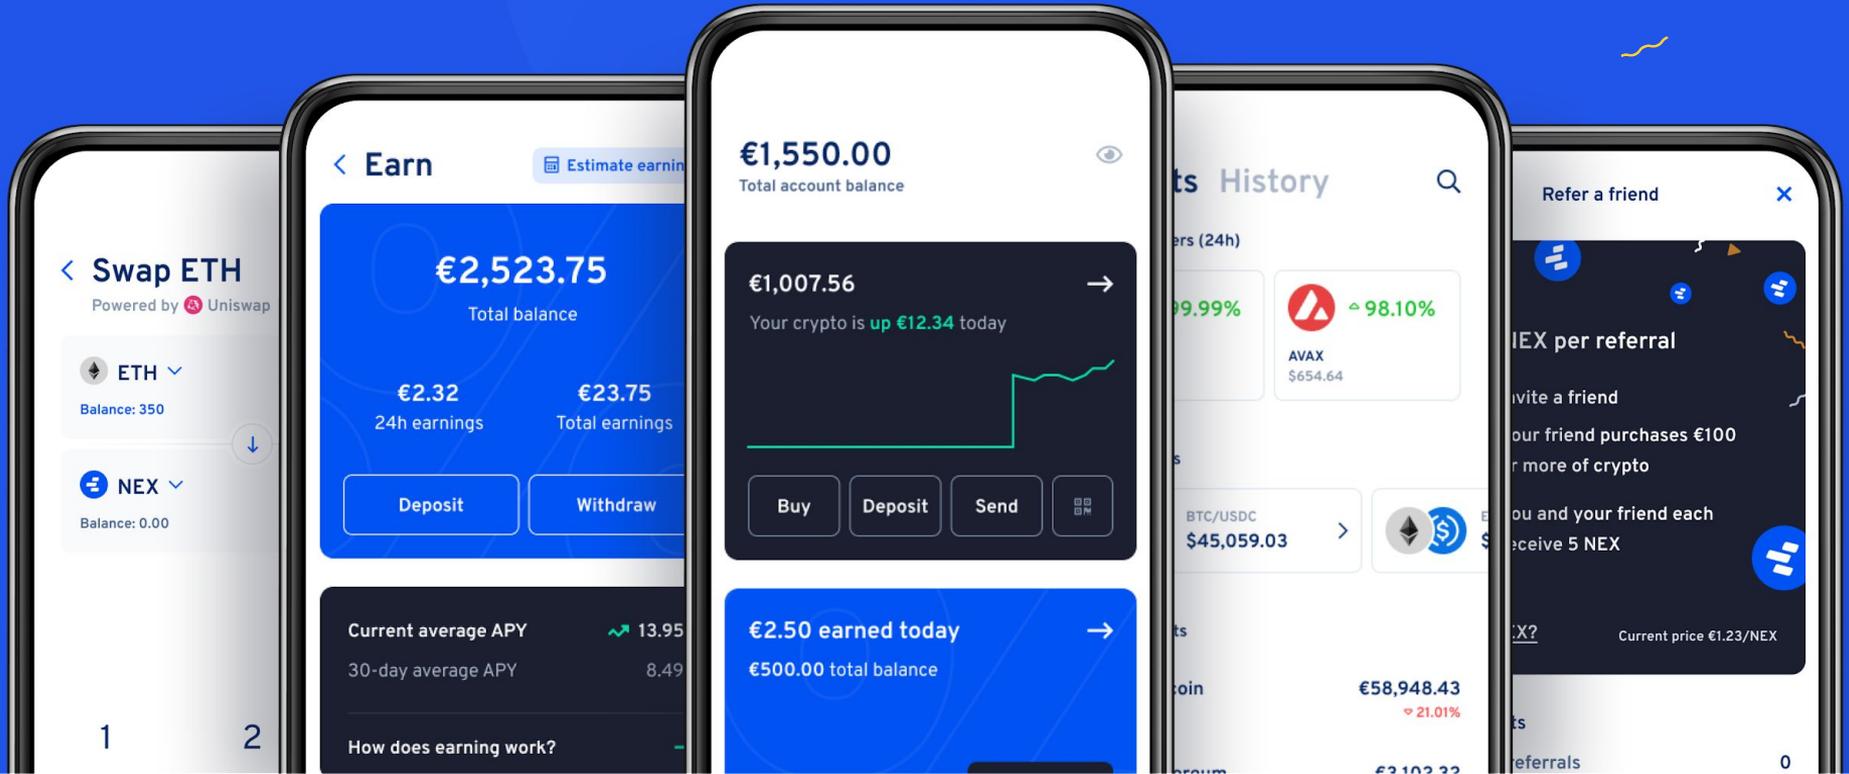

User experience

Nash offers all major crypto services in a single app, which can be connected easily to banking services.

Backed by
industry leaders

One app. All of crypto.

Next-generation wallet security

[Learn more about MPC on our blog!](#)

You have control over your crypto, unlike platforms such as Coinbase, PayPal or Binance

Your full private key is never used to sign transactions, increasing security

Secured by multi-party computation (MPC)

Integrated exchanges

Trade DeFi tokens straight from your wallet

- Nash wallets are integrated with popular decentralized exchanges, including Uniswap, SushiSwap and DeFi Swap
- We find the exchange with the best price and execute your swap there

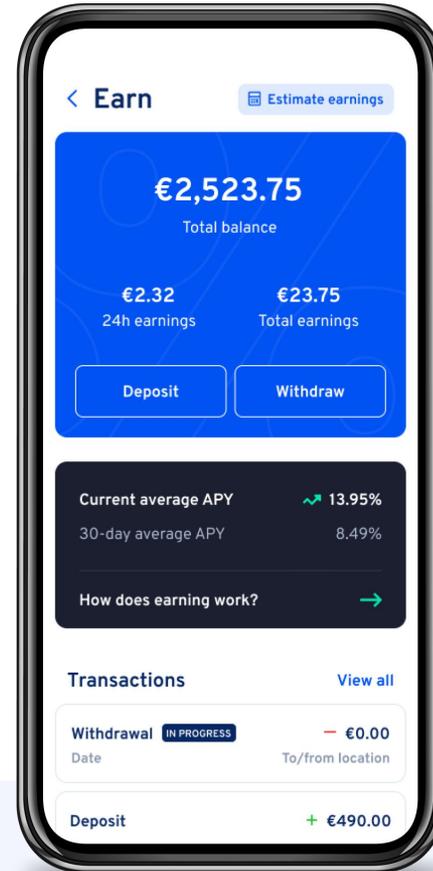

High-performance Layer-2 exchange

- Non-custodial cross-chain trading across the Bitcoin, Ethereum and NEO blockchains
- Enjoy the performance of a centralized exchange without giving up control of your funds
- Trade BTC/USDC, ETH/USDC, NEO/USDC, BTC/ETH and more!

Earn interest

Coming soon

- Deposit to a DeFi-powered earnings account in a couple of clicks – either from your existing bank account with instant SEPA or from your national currency account on Nash
- Stake Nash's NEX token and receive up to a 75% proportionate share of Nash's revenue

Markup*	0%	0%	4.37%	0%	1.37%	4.56%	4.37%	1.37%	18.93%
Network fee markup**	None	€20	None	€20	€30	€20	None	€30	None

* Nash has calculated markups by comparing quoted price with global market price across 10 Bitcoin transactions.

** These are network fees for Bitcoin transfers. Some providers exaggerate network fees, building in a hidden extra fee.

Nash has announced integrations with...

Aave logo featuring the word "Aave" in a stylized font with a purple ghost icon to the right.

polygon

Including a fiat gateway direct
to the Polygon L2 network

Avalanche logo featuring a stylized "AV" symbol above the word "AVALANCHE".

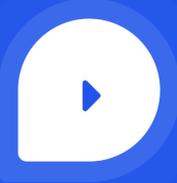

Terra logo featuring a globe icon to the left of the word "Terra".

@Nicholas19

The best place to get non-custodial #Bitcoin with 0% fees (in the EU currently) #Nash #BTC TrustYourselfes

wantsome

@DADDNEW

I use @nashsocial as main wallet. Beautiful app, you own the keys at all times and your wallet is also secured via MPC. This ist their latest addition to the wallet. What makes it also unique is their L2 cross chain exchange. I highly recommend to check it out.

Matt Mara

@MaraHardHouse

I've been using @nashsocial <http://Nash.io> since last year 0% fees on \$BTC \$ETH for europe 🤖

Thanks!
